

2027 PISTON ENGINE SERVICE SCHOOL

Lycoming Engines is pleased to announce the 2027 Engine School training schedule. The training program is a 5-day course which focuses on engine theory and disassembly/reassembly. Cost for the course is US\$1,880.00

TRAINING PROGRAM DESCRIPTION

The Lycoming Engines Service School training program includes a review of Lycoming service publications and manuals and covers construction, theory of operation, and servicing of Lycoming reciprocating engines. Additional topics include inspection, servicing, and troubleshooting of related components. Incorporated into the program is a hands-on training component with teams working on 4-cylinder Lycoming O-360 engines, learning proper procedures for engine disassembly and reassembly.

This training program is designed to equip maintenance professionals with the knowledge and skills needed to properly inspect, service, and maintain Lycoming engines. In addition to its technical depth, the program is valuable for pilots, aircraft owners, and experimental aircraft builders seeking to deepen their understanding of engine operation, performance, and related systems. The 5-day, 40-hour program will consist of 4 hours of theory-based training and 4 hours of hands-on training each day. The training hours in this program can be used for qualification for the IA renewal program FAR 65.93(a) (4).
